

BAD piece of news comes from the Paeific coast. Poor old John L. Sullivan has broken loose again. His friends are alarmed about his condition-He has begun

to drink heavily, and they fear that he will never be able to meet Slavin. They know that every time a man of his years rushes into excess the difficulty of getting back into good physical condition increases in rapid progression. dition increases in rapid progression. Sullivan has made a fine record for comparative sobriety in the last five months, and all his friends hoped that he would take care of himself until he had defeated Slavin for the champion-ship of the world. Sullivan informally conferred the title of champion on Slavin when the Australian called on him in the West last spring. This probably explains why Sullivan was so anxious to meet Slavin again. Unless the Big Fellow reforms at once the chances of his ever meeting Slavin are very slender indeed. very slender indeed.

It is very likely that Sullivan will re-tire from the stage within a few days. His backers in the theatrical business are reported to have grown weary of spending money in the effort to prove that John is a great actor. Jack Bar-nitt, who was with the Sullivan-Harrimit, who was with the Sullivan-Harrison combination on their Australian tour, says that more than \$13,000 was sunk in that venture. The expenses were enormous. There were eleven persons in the company. At one hotel \$1,250 was charged for board for four persons for four days. At least that is the story. Now that John has tried to add the trade of authorship to his other accomplishments and has begun to interpellate drunken jests among his lines in "Honest Hearts and Willing Hands," the play has lost its power to draw. The best thing that could happen to Sullivan would be a compulsory retirement to some couna compulsory retirement to some coun-try place where he could hunt and fish for six months without any chances of dissipation. But who can compel John to do anything even for his own good? One alarming symptom about his pres-ent outbreak is that he has delusions of ent outbreak is that he has delusions of persecution. This looks bad. When men lose their mental balance and become a prey to that awful form of insanity known as melancholia, delusions of persecution are among the earliest symptoms. Sullivan's idea that newspaper writers are hounding him off the stage is all nonsense. Newspaper writers tell the truth about him, as they do about everybody else, and all that they want is to see him behave himself and remain what he is, the greatest lighter America has ever produced. America has ever produced.

THAT TWELVE CLUB CIRCUIT. Indications That the Scheme May be Con

New York, Dec. 7 .- A statement made by President C. H. Byrne, of Brooklyn, to the effect that the arrangements for the twelve club League circuit had been practically finished, called forth some peculiar comments from certain Ameripeculiar comments from certain Ameri-can Association men. The Wagners, while denying that they had reached a settlement in Philadelphia with Reach and Rogers, admitted that if a majority of the Association clubs wished them to consolidate with the League club there they would do all in their power to bring that end about. This is in marked

bring that end about. This is in marked contrast to their statement of a month ago that they would not enter into peace negotiations under any consideration and would not sell out for \$75,000.

In the case of the Boston people it is well known that Prince wants to get out of base ball because of his unwillingness to put up any more money to run the Boston Reds. Baltimore and Washington have actually signed agreements to accept franchises in the new ments to accept franchises in the new league, and have made preparations to withdraw from the Association at the proper time. It won't take much to buy out Columbus, and the restoration ville club might induce that organiza-tion to look upon the twelve club scheme more invorably.

Last but not least comes Von der Ahe, List but not least comes von der Ane, the "sly old rascal of baselohl," as he has lately been dubbed. "Chris," while stating in stentorian tones that he is for war and the resurrection of the As-sociation, is known to be in favor of the new scheme; in fact, he told John Ward new scheme; in fact, he told John Ward so in my hearing during his last visit to New York, but he expressed fear at a possible vision of the "dinkey-dink," which in baseball means the same as a "freeze out" or a "throw down." Von der Ahe all this time has been watch-ing for a chance to get in out of the rain, and may at any moment come out boldly in favor of twelve clubs in the greatest organization baseball has ever

boddy in favor of twelve clubs in the greatest organization baseball has ever been honored with.

When such men as Soden, Robison, Byrne and Brush try to pull a league scheme through it generally succeeds, and those individuals who are howling and those individuals who are nowing wildly against this excellent plan may find themselves in a surprising position some day, for there is every evidence just now that they will be disappointed in a short time. in a short time.

It is the almost unanimous opinion that the proposed twelve club league is the only salvation of the national game in its present disorganized state.

ELECTRIC LIGHT COMMISSION

Stirs Up the Contractors-Nobody to Blame for the Delay in the Work, but It Exists

all the Same The electric light commission wanted to know last night who was to blame for the delay in the finishing of the electric light plant. The Wheeling Mining & Manufacturing Company, through its representative, D. R. Brooks, said it wasn't to blame; the Van Doren Con-struction Company denied that the fault lay with it, and the Fort Wayne struction Company denied that the fault lay with it, and the Fort Wayne Electrical Company was equally innocent. The burden of proof, however, lies with the last named concern. The contract for various parts of the machinery was sublet by it to different companies, and these companies, according to the statement of Architect E. B. Franzheim, have been very dilatory in sending on plans to show the location of the machinery. There is about a half bushel of plans on file in the architect's office, each subcontractor sending on a few. Mr. Brooks was unable to build the dynamo and engine foundations until he got complete plans of the floor space, and the plans in driblets did him no good.

The Fort Wayne company finally sent the plans yesterday morning; Mr. Franzheim promised to furnish Mr. Brooks with a tracing of them to-day at noon, and Mr. Brooks said he thought he could have all his work

DONE IN FOUR DAYS,

if the weather continued favorable, The original intention had been to place the engines on the floor, but Mr. Seeley thinking it preferable to have them independent, it was decided to build separate piers for the floor around the engine foundations. Mr. Brooks's bid of \$130 was accepted.

The original than also contemplated.

The original plans also contemplated an extra shafting at the south end of the building, which was not necessary at present, but could be used whenever the city decided to increase the number of laws.

the city decided to increase the number of lamps. The commission wavered awhile as to whether it would follow the original plans or not, and last night decided to have the shafting put in.

Mr. Brooks's company wanted some money, and a resolution was passed asking council to pay it \$2,000 on account. Applications are already coming in for positions in the electric light plant, but the commission decided not to fill any until they exist. The commission finally adjourned, with hones mission finally adjourned, with hopes that the stirring up the contractors had received would hasten the work.

#### Catarrh

Is a complaint so common that comparatively few people are entirely free from it, so insidious that it gains a firm hold almost before its vic tims are aware of its presence, so dangerous as to seriously threaten the general health, and liable to develop into bronchitis or

#### Consumption.

It is a mistake to consider Catarrh merely a local trouble. It is unquestionably a disease of the blood, and therefore the right way to cure Catarrh is to remove from the blood the im-purities which cause and feed it. This is to be done by taking Hoods Sarsaparilla, the great blood purifier, which effectually exspels all traces of poison and germs of disease. "I have been troubled for years with
